

E-Learning Management System

Overview

The E-Learning Management System (ELMS) is a web-based platform designed to help schools digitize learning activities. The system allows teachers to upload learning materials such as notes, PDFs, and videos, while students can access the materials online, track their learning progress, and take quizzes.

Main Users

The system has two main roles:

Teacher

Teachers can:

- Upload study modules
- Create quizzes
- Assign modules to students
- Monitor student progress
- View quiz results

Student

Students can:

- Register and log in
- Access assigned learning materials
- Study modules online
- Track completion progress
- Take quizzes and view scores

System Workflow

Teacher Workflow

1. Teacher logs into the system
2. Uploads learning materials
3. Assigns modules to students or classes
4. Creates quizzes related to modules
5. Monitors student progress and quiz performance

Student Workflow

1. Student registers and logs in
2. Views assigned modules
3. Studies learning materials
4. System tracks learning progress
5. Takes quizzes after completing modules
6. Receives scores and feedback

Key Features

- Authentication system with role-based access
- Module upload and management
- Progress tracking system
- Quiz and automatic scoring system
- Teacher and student dashboards

Progress Tracking Logic

The system calculates progress using:

- Module completion percentage
- Viewed content tracking
- Completed modules divided by total modules

Conclusion

The E-Learning Management System improves digital education by making learning materials easily accessible, tracking student performance, and supporting interactive assessments through quizzes. It helps teachers manage learning efficiently while enabling students to learn anytime and anywhere.
